

Love, Like Heavy Equipment

Speak the language of love using the terms your love understands.

You light up my life

Not neon bright

Fluorescent white

No halogen or LEDs tonight

More like a Vector™ twin-beam spotlight

with the 3-million candlepower

of 12V, H3 series halogens

powered by two 12V, 6 Amp per hour rechargeable batteries

armed with a 3-position power selection switch

hands-on or hands-free

cord or cordless

choose the illumination.

You're hot

Not tropical spot sun hot

or Thai spicy hot

or flaming campfire hot

More like a 750,000 BTU Portable Propane Torch

whose power jet burners melt ice,

incinerate tree stumps

with a 100-lb. propane cylinder

flame-control trigger valve

UL listed gas hose

aluminum extender tube

and instructions.

I feel your power

Not triple-A battery power

Or solar panel power

More like the Dyna™ 20,000 Watt, 35 HP Generator

with a 3600 RPM engine

producing 83 Amps

120/240 volts at home, on the job

and two-year limited warranty.

You push my buttons

Not dainty satin buttons

Or hotline phone buttons

More like buttons on a 2.4 Volt, 2-speed cordless
screwdriver,

Model# 6547-1,

6-position adjustable clutch;

3.5 to 26 in. per pound of torque

adjustable for tight spots

forward/reverse

forward/reverse

with battery, charger, bit set and

impact-resistant carrying case.

We fit together

Not just brush-up-against together

Not simply puzzle-piece together

More like Lovejoy™ Standard Half Couplings

that mount your engine to pump

with 11.16 horsepower

synthetic rubber inserts between the coupling halves
one fits the motor
one fits the pump shaft
194 inches per pound: the torque's max.

And Baby, you're always "on."
