

Accurate.
Experienced.
Responsive.

“We focus on delivering quality and using the technology that’s available to help us operate as efficiently as possible. Our customers appreciate this flexible, service-oriented approach. It’s the key reason for our rapid growth. Basically, it’s a ‘can-do’ approach to business.”

Frank Eberwein, Metal Processing Corporation, Founder & CEO

Metal Processing Corporation is your source for quality processing, convenient transportation and safe storage.

Accuracy.
Convenience.
Efficiency.

You'll experience exceptional personal attention that will leave a positive, lasting impression—and that's what sets MPC apart from its competitors.

Service & Flexibility that Give You the Edge

You can expect strict adherence to specifications—on light or heavy gauge materials. You can count on prompt delivery and competitive pricing. In order to best serve you, over the years, we've invested in:

- High-volume processing equipment for speed and precision—that accommodate a huge variety of coil weights, thicknesses and widths
- Advanced technologies that heighten service and product tracking
- A fleet of trucks to make transportation options simple
- Vast, climate-controlled warehousing for premier storage.

But tangible assets are just the beginning. Our fresh, entrepreneurial spirit along with the wisdom and know-how of our seasoned management team, delivers strong, creative, problem-solving capabilities that are uncommon in the industry.

Growth on a Roll

Metal Processing Corporation, founded in 1994, has enjoyed impressive growth. Our roster of both large and small organizations represents every facet of industry—and is evidence of the level of service we provide. These clients appreciate our responsiveness, efficient operation, and unique access to port and rail transportation. In addition, because we never sell metal, you can trust that *your* business is our priority. Most importantly, our focus on excellent service assures quality is always a cut above.

Our commitment to excellence protects your investment at every stage of the process: receiving to delivery.

We've experienced unprecedented growth and built a long list of satisfied customers.

One Call Does It All

MPC offers the scope of services that make *your* job easier. One call puts the process in motion.

- Our fleet of trucks ensures prompt pick-up and delivery.
- Advanced processing equipment delivers speed and accuracy to both slitting and cut-to-length work.
- Ample, climate-controlled storage areas allow us to safely warehouse your inventory.
- Sophisticated technology, such as barcoding, helps us quickly locate your product.
- Advanced systems, such as Stelplan®, link every facet of business to achieve optimal efficiency in operations.
- On-site maintenance ensures quick response when the unexpected occurs.
- Direct rail service into our plant is provided by EJ&E Railroad.

Plus, we're flexible. You can custom order our capabilities in any combination that best suits *your* needs. You specify, and pay for, only the services you need. It's that simple.

Experienced People Focused on Quality

MPC gives our undivided attention to ensuring smooth, accurate processing, safe warehousing and efficient logistics—and we have the experience to do so. Our managers average 20 years in the industry. Floor supervisors average more than 15 years of experience. This high level of expertise offers you a clear advantage: exceptional service focused on achieving *your* goals.

Customer Satisfaction

You'll discover a friendly, accommodating attitude, an eagerness to make sure *your* expectations are met. Everyone, from the president to the final inspector, is a problem solver dedicated to satisfying customers. Plus, because we never sell metals, you have an added measure of comfort that we partner for *your* success.

For one-stop metal processing, warehousing or logistics, call 877-MPC-COIL.

This area hosts the largest concentration of steel makers in the world.
